Re: National Grid Pole Petition #21691531 (Elm Street)

Donna:

I have reviewed DPW records and visited the site to view the proposed possible relocation of pole #1 on Round Hill Road to a new location on Elm Street at the intersection of Round Hill Road. It is approximately 30 feet south of its current location, if necessary for proper guy anchorage of the new pole and wiring configuration on the south side of Elm Street. The proposed possible relocation of pole #1 is part of a Smith College project which will be occurring across Elm St, that was covered by a previously approved petition. The actual need for the new pole will be determined on site during the installation of the new configuration; this application is a good faith effort to receive approval in the eventuality that it may indeed be required. If it is not required, the original location of pole #1 will be maintained.

There are no underground city utilities or public shade trees in the proposed relocation of pole #1.
